Hi ERT!

I've published - the Project ID is 2652.

It contains only the validated Laboratory Results...

Please proceed with deleting Project ID 2650.

**Subject:** Re: Gold King Mine ER Analytical (Project ID 2650)

Hello Ian,

Regarding the Gold King Mine ER Analytical (Project ID 2650) , we noticed that it contains Sampling and Location data as well as Analytical Data.

In order for Scribe.NET to manage the Sampling and Analytical data as two different data streams/projects, the Analytical project should only contain Lab Result data. All the other Operations data like locations and samples will be managed in R9 Gold King Mine Blowout (Project ID 2640).

Therefore, could you please create a new Scribe project that contains just the Analytical data (R9GoldKingAnalytical) and enter the Site # in Scribe as R9080515. Then Publish that project to Scribe.NET. We will then add that project to your USEPA Region 9 START Subscription.

Once we hear back from you, we will remove/delete Project ID 2650 from Scribe.NET

Please let us know if you have any questions.

Thanks

**Subject:** Gold King Mine ER Analytical (Project ID 2650)

Hi ERT!

Can we add Project 2650 to the USEPA Region 9 START Subscription on Scribe?

Then, could we get login information for the those wishing to view the subscription?

We're now maintaining two separate databases; one for operations (Gold King Mine ER), and one for analytical (R9GoldKingAnalytical). Both share the Site Number (R9080515).

As always, thanks for your help..
